    I have also woking experience on the window based platform, having a good Programming, analytical and logical knowledge.

Kudos Intech Software Pvt.Ltd (July – 2018). (php Laravel)

    Currently working with this company with developing laravel based projects with good understanding on functional requirements and easy implement methodology.

PROJECTS

1. Vimobiz : vimobiz is an online mobile , tablet , ipad , iphone buy and sell websites only for caneda people and other functionality is for mobile unlock tool in this websites , which provides unlock code for mobile , ipad , iphone also.

http://vimobiz.com

2 . Softrak : in this websites you can registered as user and add your won software in this websites , other person can contact you and request software to use demo purpose.

3. QRgo – Magazine : In this website is magazine website , here I give details of this project functionality

   Admin : in backend there are 3 roles (Super Admin/General Login /User).
            User can create magazine with its content then after selecting magazine language/ subject /
Section of this particular magazine and then add its page at time it will generate magazine url
(front-end) url so user can view its magazine and its page.   **Frontend :** user can view magazine details

4. Hello City (Laravel - Website) :
         This site is only travel blog related sites (tripadvisior) .There are two user type
(normal/business) user.

  Normal User :
  The normal user can (upload/manage) travel related (images/video/article).

  Business User :
  The Business user can post (job) and manage its (real-estate/apartments/yellopages) –ads blog.

  Admin:
  In admin can manage all entire process (normal user / business user) section and job/real-
estate/apartments/yellowpages advertisements blog and its related tiles.

5. Sceneapp (Laravel – api)- (Jwt /djengo Authentication)

  This app is search restaurants near user location. User can find restaurants near its location with
passing location(lat/long) , place type, radius (in meter) and search restaurants.

                                                                    Sumeet K. Sangani.
